ABC LEARNING

Moodle LMS
Feature Documentation

Features available to Students, Teachers / Faculty and Administrators

CONTENTS	Project overview and role-wise feature list
AUDIENCE	Management, clients, colleges and institutional partners
VERSION / DATE	1.1 | 30 October 2026

1. Project Overview

ABC Learning's learning management system is an online learning platform for psychiatry and medical education. It brings course delivery, protected video lessons, live classes, assessments, subscriptions with online payment and management reporting together in one branded website.

116	40	31	45
Features available	Student features	Teacher features	Administrator features

1.1 Who uses the platform

Role	What they do on the platform
Students	Register, enrol or subscribe to courses, pay online, watch video lessons, join live classes, take quizzes and assignments, and track their progress.
Teachers / Faculty	Build and run courses, add lessons, videos and live classes, create assessments, grade work, communicate with learners and monitor progress.
Administrators	Manage users, organisations, courses, subscription plans and payments, brand the site and home page, and review sales, usage and activity reports.

1.2 Platform highlights

- **Flexible course access** - learners can enrol for free, buy a single course or subscribe to a course, a bundle or the full library.
- **Indian payment methods** - UPI, QR code, cards, netbanking, wallets, EMI and Pay Later, plus direct UPI transfer with approval.
- **Protected video learning** - secure streaming with a personal moving watermark on every video.
- **Live classes** - scheduled Zoom classes that appear in every learner's calendar and timeline.
- **Academic calendar** - one calendar for lessons, live classes, sessions and assessments.
- **Management analytics** - sales, revenue, payment, usage and learner activity reports for each organisation.
- **Branded experience** - a custom home page, course tiles and site branding designed for psychiatry education.

1.3 Feature summary by role

Role	Feature areas	Features
Student	Account and Profile (5), Dashboard and Navigation (6), Enrolment, Subscriptions and Payments (10), Learning Content and Live Classes (7), Assessments and Progress (4), Communication and Calendar (8)	**40**
Teacher / Faculty	Dashboard and Profile (3), Course Building (11), Assessment and Grading (7), Learner Management and Monitoring (5), Communication and Calendar (5)	**31**
Administrator	Users and Organisation (7), Subscriptions and Payments (12), Video Management (4), Branding, Home Page and Dashboard (7), Calendar (2), Reports and Analytics (11), Site Access and Data (2)	**45**

Only features that are available to users today are listed in this document.

2. Student Features

Features available to learners after they register and sign in. **40 features** in total.

2.1 Account and Profile

Feature	What it does
Online registration	Create your own account using the sign-up form and activate it from the confirmation link sent to your email.
Secure login	Sign in with your username or email address. All courses and learning content are visible only after signing in.
Password recovery	Reset a forgotten password through a secure link sent by email.
Profile management	Update your personal details, profile photo, description and notification preferences.
Profile card	Open a quick profile card from the top menu showing your details and last login, with one-click logout.

2.2 Dashboard and Navigation

Feature	What it does
Personal dashboard	See your courses, upcoming deadlines, a monthly calendar and recently opened items on one page.
My Courses	All enrolled courses are shown as cards with a progress bar and a 'Continue learning' button.
Course catalogue	Browse every available course with its image, category and summary, and enrol, continue or view it with one click.
Branded home page	A Department of Psychiatry home page presenting featured courses, topics and the recommended learning pathway.
Easy course navigation	Move through a course using the course outline panel, breadcrumbs, section icons and picture-based activity tiles.
Quick menu links	Subscriptions and Calendar are available directly from the top menu.

2.3 Enrolment, Subscriptions and Payments

Feature	What it does
Self-enrolment	Join open courses directly from the course page.
Buy a single course	Purchase access to an individual course and pay online in Indian Rupees.
Subscription plans	Choose a plan for one course, a bundle of courses or all courses, with several duration options. The monthly price and savings are shown for each option.
Clear checkout	Before paying, see exactly which courses are included and the date your access will end.

Feature	What it does
Online payment options	Pay by UPI, UPI QR code, debit/credit card, netbanking, wallets, EMI or Pay Later. PayPal is also offered.
UPI transfer with reference number	Pay directly to the institution's UPI ID and submit the transaction reference; access is given once the payment is approved.
Instant access after payment	Courses unlock automatically as soon as payment succeeds. If a subscription ends, your progress and grades are kept for when you renew.
My Subscriptions	See each subscription's status, end date and the courses it unlocks.
Subscription renewal	Renew at any time; the new period is added to the time you have left.
Course expiry reminders	For individually purchased courses, receive reminders 7, 3 and 1 day before access ends, plus a renewal page.

2.4 Learning Content and Live Classes

Feature	What it does
Video lessons	Watch high-quality course videos inside lesson pages.
Protected video streaming	Videos are streamed securely and cannot be downloaded or shared outside the course.
Personal video watermark	Your name, email, IP address and the date appear as a moving watermark on every video to discourage recording.
Lesson pages	Rich lesson pages that combine text, images and video.
Learning resources	Files, folders, web links, books, interactive H5P content, SCORM packages, guided lessons, glossaries and wikis.
Live classes	See the date, time and status of each live class and join the Zoom session (with passcode) when it opens, from the class page or your Timeline.
Appointment booking	Book one-to-one or group appointment slots offered by your teachers.

2.5 Assessments and Progress

Feature	What it does
Quizzes	Attempt timed quizzes with feedback and review of your answers.
Assignments	Submit written work or files online and receive grades and feedback from teachers.
Grades	View your grades for each course and an overview across all your courses.
Progress tracking	Activities are marked complete as you work, and your progress percentage is shown for each course.

2.6 Communication and Calendar

Feature	What it does
Announcements	Receive course announcements from teachers on the site and by email.
Discussion forums	Take part in course discussions, subscribe to topics and receive email digests.
Messages and notifications	Send private messages and receive on-site and email notifications.
Subscription and payment alerts	Get notified about payment approvals and changes to your subscriptions.
Academic calendar	See classes, deadlines and events in month, week, day or list view, filtered by course, with colour-coded event types.
Upcoming events	Your next deadlines and events are listed on the dashboard and course pages.
Calendar export	Add your course calendar to Google Calendar, Outlook or your phone using a calendar link.
Blogs	Write and read personal learning blogs.

3. Teacher / Faculty Features

Features available to teachers and faculty for building and running their courses. **31 features** in total.

3.1 Dashboard and Profile

Feature	What it does
Teacher dashboard	See your courses, upcoming deadlines, calendar and recently used items in one place.
Faculty profile	Maintain your profile details, photo and description.
Course analytics	A dashboard for your own courses showing enrolments, active learners, learning time, video views and course completions.

3.2 Course Building

Feature	What it does
Request a new course	Request a new course; it is created after administrator approval.
Course editing	Edit course settings, summary and course image, and switch editing on to change content.
Section management	Add, rename, reorder, hide and remove course sections and sub-sections.
Upload learning materials	Drag and drop files and add folders, web links, books, H5P, SCORM and other resources.
Lesson pages with visual designer	Create lesson pages and design them with a drag-and-drop page designer.
Activity images and icons	Give each activity its own picture, icon and colour so the course looks like a visual tile board.
Add video lessons	Insert a protected video into any lesson page using its video code; security and watermarking are applied automatically.
Live class scheduling	Create a live class with a Zoom link, passcode, date, duration and joining time; it appears automatically in learners' calendars and timelines.
Appointment scheduler	Publish appointment slots, then record attendance, grades and notes for each appointment.
Course backup and copy	Back up, restore and duplicate courses (live class links need to be re-added after a copy).
Course reset and groups	Reset a course for a new batch and organise learners into groups.

3.3 Assessment and Grading

Feature	What it does
Quizzes	Create quizzes with many question types, time limits, attempt rules and review options.
Question bank	Build and organise reusable question banks with categories, import and export.
Assignments and evaluation	Set assignments and grade submissions with comments, feedback files, rubrics or marking guides.
Gradebook	Manage grades, grade categories and weightings, and export grades.
Certificates	Design certificate templates (name, course, grade, date, QR verification code) and issue them automatically.
Badges	Create badges and award them for achievements in a course.
Course completion rules	Define what learners must do to complete a course.

3.4 Learner Management and Monitoring

Feature	What it does
Enrol learners	Enrol and remove learners manually or by group. Learners who subscribed are managed automatically.
Progress monitoring	Check each learner's activity completion and overall course progress.
Activity reports	View course participation, activity logs and a per-course summary of learner activity.
Learning time	See the estimated time learners spend in each course.
Report export	Download course reports as CSV or PDF (editing teachers).

3.5 Communication and Calendar

Feature	What it does
Announcements	Post course announcements that reach learners on the site and by email.
Discussion forums	Create and moderate forums, and rate or grade posts.
Messaging	Message individual learners or the whole class.
Calendar events	Create course events (lesson, live class, session, assessment) with online/offline mode, location and weekly repeats, and edit or cancel them.
Upcoming events	Show upcoming course events on the course page.

4. Administrator Features

Features available to administrators and managers for running the platform and the business. **45 features** in total.

4.1 Users and Organisation

Feature	What it does
User account management	Add, edit, suspend and delete student and teacher accounts, upload users in bulk, and log in as a user for support.
Roles and permissions	Assign roles such as manager, course creator, teacher and student at site, category or course level.
Learner groups (cohorts)	Create site-wide learner groups for bulk enrolment and access rules.
Organisations	Each top-level course category acts as an organisation with its own managers, reports and calendar filter.
Course categories	Create and organise course categories.
Course management	Create, edit, hide, move and sort courses across the site.
Enrolment methods	Choose how learners join courses: manual, self-enrolment, cohort, paid course or subscription.

4.2 Subscriptions and Payments

Feature	What it does
Subscription plan setup	Create plans for a single course, a bundle or all courses (with exclusions), each with several durations and prices, a grace period and an active/inactive switch.
Plan preview	Preview exactly which courses a plan includes.
Subscription options	Turn single-course/bundle plans and all-access plans on or off.
Exclude a course from all-access	Keep selected courses out of all-access plans.
Subscriber management	Search subscribers and view each subscription's full history; extend, cancel or revoke with a recorded reason.
Manual access grant	Give any plan to a user for a chosen number of days, e.g. for scholarships or offline payments.
Allow or block access	Always allow or always block selected users or learner groups for specific courses.
Access checker	See whether a user can access a course and the reason why.
Payment follow-up	List unfinished checkouts and convert them into subscriptions once payment is confirmed.
Payment methods	Choose which payment methods are offered (UPI, QR, cards, netbanking, wallets, EMI, Pay Later, PayPal) and any surcharge.
UPI payment approval	Approve or reject UPI transfers submitted by learners; learners are notified automatically.

Feature	What it does
Expiry reminder settings	Set when learners are reminded before a purchased course expires and show an expiry banner.

4.3 Video Management

Feature	What it does
Video player settings	Set the standard size and appearance of the video player.
Watermark setup	Choose what the moving watermark shows (name, email, IP address, date).
Protected playback	Videos play only inside courses for signed-in learners.
Video usage overview	See the number of videos, total duration, storage used and video views per organisation and course.

4.4 Branding, Home Page and Dashboard

Feature	What it does
Site branding	Set brand colours, logos, menu style, breadcrumbs, footer columns and copyright text.
Setup wizard	Configure the look of the site step by step.
Home page builder	Build the home page visually from 63 ready-made section designs (banners, course carousels, pricing, FAQ, testimonials, statistics and more).
Section and banner manager	Add, hide, reorder and preview home page sections and create custom banners with text, button, colours and background image.
Course branding	Give individual courses their own banner style, section icons and colours.
Login page design	Choose from eight login page designs and set the background image and logo.
Default dashboard	Decide which blocks every user sees on their dashboard.

4.5 Calendar

Feature	What it does
Calendar settings	Use the academic calendar as the site calendar and choose how far back and ahead events are shown.
Organisation and institution events	Publish events for a whole organisation or the entire institution.

4.6 Reports and Analytics

Feature	What it does
Analytics dashboard	Overview, sales, usage and activity figures for one organisation or all, with date ranges, comparison with the previous period and charts.

Feature	What it does
Sales and revenue	Revenue, successful payments, active paid subscriptions, abandoned and failed payments, success rate, average order value and top-selling items.
Payment and transaction reports	Search and filter every transaction by status, method, course or plan, and open the full details of each payment.
Usage report	Logins, course visits, file and video storage, and video views.
Organisation statistics	Learners, active learners, enrolments, completions and learning time for each organisation.
Student activity	Active learners, participation per course and a detailed activity log.
Teacher activity	Totals of teacher activity by period, course and organisation.
Course completion reports	Completion numbers and trends by course.
Standard site reports	Logs, live activity, course participation and course overview reports.
Custom reports	Build your own reports and export them.
Report export	Download reports as CSV or PDF.

4.7 Site Access and Data

Feature	What it does
Login-protected site	All content is available only to signed-in users, with password rules and automatic session timeout.
Course backup and restore	Back up and restore any course on demand.
